

Meeting Report
ISO TC 188/ WG 29
Amsterdam, The Netherlands
November 18, 2013

Technical Committee 188 – Working Group 29, Galley stoves

1. The transitional period for introduction of new standards in ISO is requested to move from 6 to 12 months. The industry is asking for a 12 month transitional period for this standard, due to the addition of heating appliances to the scope of the standard.

ISO 14895, Liquid – fuelled galley stoves and heating appliances

1. Some heaters come with low voltage cut-off devices. This potential requirement will be submitted to the Electrical WG for consideration for all battery-operated appliances.
2. A duplicate label containing manufacturer's information shall be provided by the manufacturer and installed, if needed, after appliance installation.
3. Added requirements for use of both permanent fuel tanks and portable fuel tanks.
4. Added a requirement for a flame failure device. Still need to define this device and its operational requirements.
5. Deleted the requirement that the appliances are room-sealed.
6. Next Action: Next meeting of the WG will be held at Boot Dusseldorf 2014.
